commonplace in recent years due to the forensic method of DNA fingerprinting, originally developed in Britain in the early 1980s.

CHAPTER 13 Analysis DNA Fingerprinting

Biology Simulations helps students to learn about biology and practice data analysis skills. These simulations allow students to experiment with concepts that may take too much time or too many resources to complete in a traditional science lab setting. While simulations cannot replace real-world experiences, they are a useful tool in both scientific research and education.
